

EXECUTIVE SUMMARY

- 7+ Years Software Engineering Experience:** Proven expertise in native Android (Kotlin, Java) and cross-platform React Native enterprise app development.
- Certified AI Specialist:** Strong foundation in Machine Learning, Deep Learning, Agentic AI architectures (LangGraph), and Retrieval-Augmented Generation (RAG).
- Architecture & Scalability:** Deep experience with MVVM, Android Jetpack, RESTful APIs (Retrofit), SQLite/Room, Firebase, and LLM orchestration workflows.
- Fintech & Security:** Specialized in building secure digital payment systems, e-KYC compliance, and real-time transaction processing.
- Leadership & Mentorship:** Demonstrated capability in leading development teams, conducting code reviews, and delivering enterprise software products.

TECHNICAL EXPERTISE

AI & Machine Learning	Agentic AI (LangGraph), RAG, ChromaDB, XGBoost, Deep Learning, Prompt Engineering, Claude AI Workflows
Mobile Engineering	Android Native (Kotlin, Java), React Native, Jetpack Compose, Core Android Architecture (MVVM)
Backend & Cloud	Python, FastAPI, Docker, Microservices, REST APIs, AWS Services
Databases & Storage	SQLite, Room Database, Firebase Realtime DB, Vector Stores (ChromaDB)
Tools & Platforms	Git, SVN, Android Studio, VS Code, Linux, Windows

KEY PROJECTS

SHG Loan Decision Agent

Agentic AI & ML Architecture

Technologies: Python, LangGraph, FastAPI, XGBoost, RAG, ChromaDB, Docker, React

- Developed an Agentic AI loan decision system using **LangGraph**, integrating an **XGBoost** eligibility prediction model with RAG-based policy verification.
- Engineered **FastAPI** microservices for real-time ML prediction, policy retrieval, and agent workflow orchestration with PDF policies indexed in **ChromaDB**.
- Implemented a multi-step agent execution pipeline to automate loan eligibility checks, policy rule compliance, and AI-generated decision rationale.
- Containerized services using **Docker** and built a **React** dashboard for application submission and automated decision visualization.
- Handled severe class imbalance using **SMOTE**, class weighting, and cross-validation for rigorous model evaluation.

Money Purse – SHG Banking App (Fintech)

Enterprise Mobile Solution

Technologies: React Native, Claude AI, Signzy, Leegality, Digio APIs, SQLite, Retrofit

- Digitized banking and credit operations for Self-Help Groups (SHGs) handling sensitive financial transaction data.
- Modernized core application modules using **React Native** and **Claude AI** developer integration to accelerate feature delivery.
- Integrated third-party e-KYC APIs (Signzy, Leegality, Digio) and managed secure offline storage via SQLite and Mantra RD.

KEY PROJECTS (CONTINUED)

Enterprise Mobile Analytics SDK

Cross-Platform SDK

Technologies: Android Native, iOS, Custom Analytics Engine

- Architected a lightweight, cross-platform tracking SDK deployed across enterprise client apps to capture metrics, user engagement, and campaign telemetry.

Leuf – On-Demand Fuel Delivery App

Location-Based Mobile App

Technologies: Android, FCM Push Notifications, Firebase Realtime DB, Google Maps API

- Built a dual-interface delivery application integrating live GPS tracking, push notifications (FCM), and dynamic driver-consumer matching.

Raptor Experts – Learning App (NEET/JEE)

Offline-First App

Technologies: Android Native, SQLite Local Storage

- Built an offline-first self-learning application managing complex local database storage for mock tests and study material delivery.

PROFESSIONAL EXPERIENCE

Senior Android / Mobile Developer — Anniyam Payment Solutions

Oct 2021 – Present

- Leading end-to-end mobile engineering for secure, high-throughput payment applications in the fintech sector.
- Architecting scalable codebases using Kotlin, Android Jetpack components, and React Native bridge modules.
- Overseeing security compliance for digital transactions and mentoring junior software developers.

Senior Android Developer — Raptor Technology

Mar 2020 – Sep 2021

- Developed high-volume mobile applications and reduced app crash rates through performance profiling and memory optimization.
- Collaborated closely with cross-functional QA, backend, and product management teams.

Senior Programmer – Android & React Native — Walinns Innovation

May 2017 – Mar 2019

- Engineered custom UI components and integrated complex RESTful APIs for cross-platform applications.

Junior Android Developer — Nano Nino Inc

Jan 2016 – Apr 2017

- Participated in full lifecycle native Android development, code reviews, bug fixes, and unit testing.

EDUCATION & CERTIFICATIONS

Master in AI Certification

App Innovation, Coimbatore

May 2026 – Aug 2026

Focus: ML, DL & Agentic AI

B.E. - Computer Science & Engg

Univ. College of Engg, Nagercoil

2010 – 2014

Score: 85%

HSC - Computer Science

Girls Higher Sec School, Tirunelveli

2009 – 2010

Score: 81%

SSLC

Girls Higher Sec School, Tirunelveli

2007 – 2008

Score: 91%
